JUNE GREENS UPDATE

- GOLF COURSE UPDATE

- The golf course made it through the fifth driest May on record and 23 days in a row without any rain fall into early this month. This past week we received roughly 1.5 inches and it was very refreshing.
- We will begin our annual edging of the bunkers this week. Please understand if not every bunker is raked during this time as we are diverting resources to complete this important task. Plan to complete them in 7-10 days.
- The native areas both new and old are looking excellent please continue to respect these areas by refraining from driving in them. The grounds crew will continue to maintain these areas for ascetics and playability as needed all season long.

- New Business

- 2023 Spring upgrades: Water Coolers, Halfway House Patio, Cart paths 1 & 10 Tees, Memorial Area, Damaged Brick Removal
- Still to be completed: Hand Railing/Stair clean up on #1 tee and curb installation adjacent new #1 tee area.
- New wooden bunker rakes ordered! This will greatly increase the look of our course and allow us to increase the number of rakes around the property. Time frame is unknown at this time as we need to build upon arrival.
- Bunker renovation plan presented.
