## FEBURARY GREENS UPDATE

- GOLF COURSE UPDATE
  - Temporary pins and walking only remain in effect until further notice.
  - Tree Debris clean-up has been constantly underway thanks to having staff members all season long to keep up on things.
  - The exceptionally warm weather has caused most of the turf to break dormancy and begin green up, this is not ideal this early, but with cold weather in the forecast we hope to see things slow down again for the month of March.
  
- Tree Management
  - Tree removals are complete for the season, we got a lot done and opened the place up even more, as well as removed several trees in an attempt to increase turfgrass health.
  - A 55' lift has been rented for the past two weeks and we have it for two more. Our priorities are pruning back any trees that leave debris on a green, tee, or fairway to help reduce labor throughout the season and improve turf quality. In addition, we are trimming up low hanging branches to improve playability across the property.
  - Stump Grinder rental arrives March 6<sup>th</sup>. Expect 2 weeks to grind and another couple week to clean grindings.
  
- New Business
  - Water cooler update/Rebuild
  - Shop Bathroom upgrade!
  - New equipment expected to be here in April!!!
