## OCTOBER GREENS UPDATE

- **GOLF COURSE UPDATE**

- We received the first frost of the season this week and growth has begun to slow down; we are also seeing the first wave of leaves coming down from the trees. Fall is Here!
- Addition of sand in phase 1 of the bunker renovation project is well underway and number 10 and 11 are complete and ready for play. We will wrap up on 16 this week with new sand and removal of one of the bunkers. Sod will follow in the weeks to come.
- The new sand will be compacted with several different techniques however we anticipate it be softer than normal for a little while.
- Materials at this point will only allow us to complete #16. Pushing back #8 into next fall's plans.

- **New Business**

- Elimination and re soding of new grass bunkers/mounds this month.
- Low cut connection of Event Lawn with 18 Tee and 5 green with 6 tee this month.
- Additional drainage work to problem areas.
- Irrigation blowout early November.
