JULY GREENS UPDATE

- GOLF COURSE UPDATE
 - Very opposite to the spring we have been wet and humid through the month of July and the disease pressure and growth rate are at almost maximum they can be.
 - We have applied a growth regulator to the green and tee surrounds in hope to make them more uniform and cleaner on a daily basis.
 - Preventative pest applications going out this week for grubs.

- New Business
 - Walk Bridge on 17
 - Nursery establishment is going well and we should be able to patch the putting green this fall!
