# MAY GREENS UPDATE

## 1. LABOR UPDATE

- A. Currently at 17 seasonal hires, 6 of which are full time now, with 5 more becoming full time in June and the others remaining part time all season.
- B. Stoney has retired due to wife's health needs. Search for replacement is underway, mechanic hiring process is very difficult.

## 2. GOLF COURSE UPDATE

- A. Par 3 tee recovery looks pretty good but we still have a little way to go, emphasize using divot buckets on the tees. I want to fill twice a week!
- B. Purchase more divot buckets? Make nice ones in off season?
- C. Remove mat on #12 this weekend?
- D. Bunker restoration will start 2<sup>nd</sup> week of June.

## 3. PUMP STATION/IRRIGATION UPDATE

- A. Pump station working how it is supposed to so far! Pumps are shutting off 4/5 times we use them.
- B. Quotes for several different controllers are available for us, need to choose how much we want to spend and who is going to install it. Vince from mid-Ohio electric recommends multiple quotes.
- C. Pump is no longer most immediate problem. New satellite controller for hole #1 malfunctions every night irrigation is used. Leading to the entire first hole being unacceptably wet. A call is in to get a repair visit and these repairs/replacements should be under warranty.

## 4. NEW BUSINESS

- A. Choose date to put out new pins and flags.
- B. I am told Tee markers are on pace to arrive by invitational if all stays on schedule.
