# OCTOBER GREENS UPDATE

- GOLF COURSE UPDATE

- Fall cultural practices are complete on the golf course, we will now focus on leaf clean up, sod, and drainage projects.
- With the number of leaves still on the trees I anticipate leaf clean up will continue until snow is on the ground and like last fall, may not be able to be fully completed.
- Native areas have been cut down for season as part of our annual maintenance plan, please still keep carts out of these areas.

- Tree/Leaf Management

- Starting October 24<sup>th</sup>, we will no longer be cutting the intermediate rough, we will transition this mower to a height that can help in mulching leaves on the golf course. The intermediate cut around the fairways will return in the spring.
- In the coming weeks we will start to trim low hanging branches that we can get with our equipment.
- Movement of the pile of trees next to 1 tee will take place this upcoming month before the planned burn in December.

- New Business

- Nursery construction to begin this week in house near 3 tees.
- Irrigation blow out scheduled for Nov 10,11<sup>th</sup>
- Deep-tine aerification scheduled for Nov 15<sup>th</sup>
